Yundian Ruikong (guangdong) Technology Co., Ltd.

CONTROL CENTER CUSTOM INTEGRATED SOLUTION PROVIDER

Intelligent Console Products and Cases for Command Workstations

About us

Yundian Ruikong is located in Guangzhou, China, we are a leading supplier of intelligent consoles, data centers, and smart front-end supporting product solutions in China. We are committed to "high-tech as the foundation, product centered" and have multiple self-developed patented technologies. The company has an independent research and development center and production base, with a professional design team that integrates research and development, manufacturing, and sales services. The product has passed management system certifications such as ISO9001, ISO14001, ISO45001, and obtained certificates such as CE, SGS, and RHOS.

Product production base

With 18 years of experience supporting personalized design throughout the entire process, we have been committed to promoting "international quality local cost-effectiveness" as the core, providing higher quality products, high cost-effectiveness, and services; Provide successful cases for ten major fields including public safety, finance, energy, power grid, airports, and military.

HENGYUN-Y Material

SMART CONTROL CENTER CUSTOM INTEGRATED SOLUTION PROVIDER

Tabletop Edge:
The outer edge of the worktable top is formed by casting flexible polyurethane, with a width of 38mm. By eliminating contact stress caused by hard and sharp edges, it enhances the comfort of the operator's wrists.

Multi-functional Reinforced Aluminum-Magnesium Alloy:
LCD monitors and desktop accessories can be mounted on the aluminum profile back panel wall. With a height of 160mm or 320mm, it can effectively hide wiring without affecting visibility or interfering with other operators. The structural wall can be covered with sound-absorbing and building materials, and can be adjusted (added to or reduced) according to requirements.

Buffered Keyboard Drawer:
The palm rest is made of soft polyurethane material, ensuring a smooth and comfortable feel. The tray is constructed with double-folded steel plate, featuring a smooth surface with no sharp edges—this guarantees safety and durability during use.

Backlit Logo:
It enhances the sense of technology and can display information such as the customer's logo or seat name.

Support Feet and Leveling Feet:
All support feet of the console and worktop supports are made of die-cast aluminum components (produced via mold opening). The surface treatment applied is anodization.

Acrylic Ambient Lighting:
It serves a decorative function and enhances the overall atmosphere.
